NextBASIC Unimplemented Features (Updated 12 Feb 2018)

This document lists the as-yet-unimplemented features of NextOS/NextBASIC, as at the current version of NextOS (**v1.96**). These are planned to be present by the cased machines release (by v2.00).

This should be read in conjunction with the other documents:
    NextBASIC file-related commands and features
    NextBASIC new commands and features
    NextOS Editor features
    NextOS API

Unimplemented features

Drive images (C:/NEXTOS/CPM-*.P3D and C:/NEXTOS/DRV-*.P3D) are not yet automatically mapped, and cannot be manually mounted.

+3 floppy disk images (*.DSK) cannot yet be mounted.

Spanish language version of the ROMs is not yet available.

CP/M loader option not yet implemented.

The **.install** dot command doesn't yet support allocation of additional 8K banks for driver usage.
